(a) The turn at one vertex

$$\theta_i = X + Y$$

$$X = \arcsin(\kappa_i h_{i-1}), \qquad Y = \arcsin(\kappa_i h_i)$$

(b) The developed edges

$$\psi_j = \sum_{m=0}^{j} \theta_m$$

$$\mathcal{T} = \sum_{i=0}^{5} \theta_i = \psi_5 \simeq 4.915 \neq 2\pi$$
