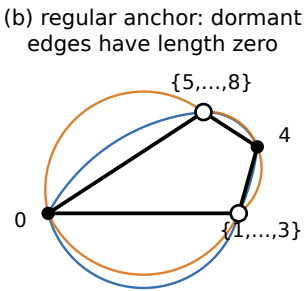
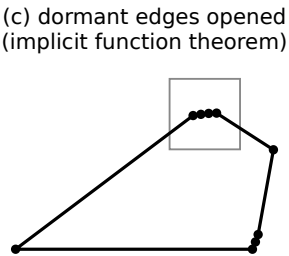
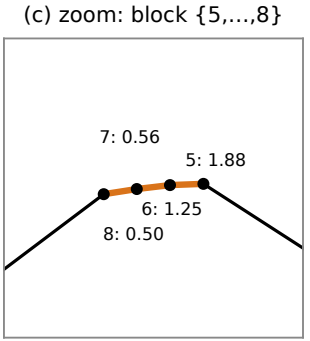
(a) the curvature word; four active edges $e_0, \ldots, e_3$ and their eight endpoint readings
e_0
e_1
e_2
e_3
0
1
2
3
4
5
6
7
8



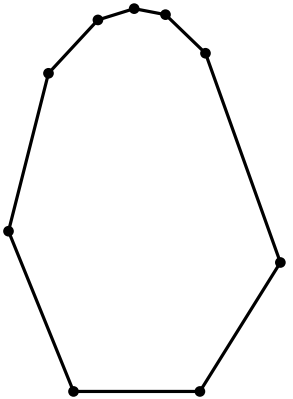
(b) regular anchor: dormant edges have length zero
{5,...,8}
4
0
{1,...,3}



(c) dormant edges opened (implicit function theorem)



(c) zoom: block {5,...,8}
7: 0.56
5: 1.88
6: 1.25
8: 0.50



(d) the same curvatures, another realization
